

SENIOR RESEARCH SCIENTIST

Applications are sought from suitably qualified persons to join a vaccine research and development group at Flinders Medical Centre, headed by Professor Nikolai Petrovsky and funded by Vaxine Pty. Ltd. Vaxine focuses on the development of vaccines for human health. We are seeking a motivated and experienced person who is able to work in a dynamic team environment.

The successful candidate will have:

- PhD in an appropriate scientific discipline (or equivalent)
- Sound knowledge of the principles of immunity and immunological techniques,
- Extensive knowledge of methods, materials, procedures and techniques used in immunological research and experimental laboratory work
- Strong practical skills in in vitro and in vivo immunological techniques
- Strong written and verbal communication skills

Experience with computer based statistical analysis packages such as Prism and SPSS would also be an advantage.

Salary: Competitive salary packages are offered, commensurate with qualifications and experience. The contract would be for one year in the first instance, with opportunities for further extension subject to satisfactory performance.

Applications (original and two copies if applying by post): Letter of interest and CV providing full details of tertiary qualifications, employment history and relevant experience together with the names and contact numbers of three referees should be forwarded to:

Ms. Sharen Pringle, Business Manager, Vaxine Pty Ltd,
Email: sharen.pringle@flinders.edu.au
or PO Box 18, Flinders University, Bedford Park SA 5042.
