

Vaxine Pty Ltd is the leading Australian developer of pandemic vaccine solutions. Vaxine has developed a proven adjuvant and recombinant protein vaccine platform that can be quickly adapted to any pandemic situation with a safe and effective vaccine. As an Intern at Vaxine you will be involved in different areas including basic research, vaccine development, production and quality. We're committed to giving you endless opportunities to learn and develop, so that you can thrive in your early career. Our highly trained team of scientists will help you build valuable skills and hone your techniques that will be valuable to your ongoing science career. At the end of the Intern year, high performing interns will be offered full time employment.

We are looking for the brightest stars who are Innovative, confident and committed graduates, keen to pursue diverse and rewarding careers in the biotechnology industry.

If you have a GPA of above 5.5 please send your CV and University Transcripts to Sharen.pringle@flinders.edu.au
